He [x10] MAN
From the power bestow the army by the third coast (He
Man)
Even the trenches of atlanta where they learned most
(He Man)
You never heard before flow is extra ordinary

He [x10] MAN
From the power bestow the army by the third coast (He
Man)
Even the trenches of atlanta where they learned most
(He Man)
You never heard before flow is extra ordinary
And if the burners blow folks is in the mortuary (He
Man)

Even preventing destruction of this rap music (He Man)
Find a blind spot on my wall and put a plaque to it (He
Man)
I'm in the class all by myself nobody's messing with me
(He)
Feel free to ask about my wealth I got the weapons with
me (He)

So come and get me I'm here
People send me automatic near* no need to fear I wipe
out the windshield untill you see me clearaa
I ruin carreers so hide away your tears no shook once
here until you look inside the mirrora
Shift rappin' the second gear stood up and I volunteer
now the industry's screaming but can you hearaa
The ladies just cheer sometimes their lipstick will
smear cause in my line of work this he-man needs a
Sheaa (He Man)

I've been appointed straight from the power of grade
school (He Man)
Believe the master of the universe gets great school*
(He Man)
I'm so ferocious chopping heads of with my battle axe
(He)
Got many faces give them wiplash when I battle them

(He Man)

A diabolical technology like skeleton (He Man)

Was trained in the arts of throwing you through the
sella door (He Man)

I'm checking off my enemies until I get some more (He)

With powerful beams that disperse from my luda
crystal balls (He Man)

Until the system falls their family will miss em' all kiss
em all goodbye and I try to warn all of em'

I guess I really pissed em' off peel the cap and twist
them up if you got homies then call of em'

These bombs are ticking them off fans are ripping

them off yo titles aint purchase people just borrow em'

And me I'm dismissing them all really insisting they all

quit and hurry up before tomorrow comes! (He Man)

I've been unleashed from the belly of the beast man

(He Man)

Let's have a feast I'll put the toast up to your teeth
man (He Man)

With the flick on my wrist switches all activate (He)

Turbo packs which insure me that your back away (He
Man)

As neck N' neck neck extends straight up and bends

(He Man)

You'd be wishing you wore depends* and call the double
friendz (He Man)

I contropose that search power from my finger tips (He)

Dont get the notionz I can give some middle finger tips

(He)

Is just a gift from me to you and there's no telling what
we would do

I keep the crew close by and their ready to clap [Echo]

I keep the peep in the stew so they look like winnie de
pooh

If you have no clue then I recommend that you get back
[echo]

See I'm only keeping it true thats what real players will
do

And I'll let the hollow just spew you'd be under attack

[echo]

And then I'll bend you a doo and probably send you a
few flowers to your funeral no way to snap [echo]

A place where sourcery science and magic intertwine
and where mysterious forces maintain the streets is
mine

With special automatic armor that contains gadget no
one can get to my level I think the game is MY!
