Here we are once again
Another victom of this game
li don't think it's right
They go out it's cool
To fight money rules all their freakin' lives
Poverty and strife
Our president even hates his wife
Values lost so long ago values lost into the unknown
I guess it's hard to find your notch in society turned
upside down
We got to fight we can pull it through
All the hard times we've been through
Take our hands come with us now
Christ will never let you down
Parents push it in your mind
Study work and no free time
You know you want to stand up for what's right you've
gotta want a happy life
But the system tries to suck you in
Fight it till the very end don/t follow what they think is
right
Come with us we'll learn to fight
We'll live our lives for the Lord our saviour through
strong faith neverfading
Slap reality back to your life
Medicine for those restless nights
Your life is on a dead end track from failures in the
past
You've gotta open your eyes to see the love He gave
for you and me
I know you have your doubts selfish ways into account
Live your life for God he/s the only way
We've got to fight we can pull it through
All the hard times we've been through
Take our hands come with us now
God will never let you down
