Follow me  
I need you, I plead you  
To come through  
Take the lead  
You know that I'm right behind you  
I loved you and what do I get back  
I still lack the feeling you get  
When there's someone for you

Take me home, take me home  
I'm alone here, have no fear, I'm safe but alone  
It's a cold world, a lone world, it's hard for a girl  
I wish you'd open up your eyes  
See my pain through all the lies  
In this room I wish I'd die  
Though my tears I do not cry  
Take me home

Is this the end?  
You messed up  
You're bad luck

You take it out on me.  
You reprimand me  
My choices, my voices, the way I live my life.  
I pray to the angels, stand by me, beside me,  
Protect me from pain  
And the darkness around.

Take me home, take me home  
I'm alone here, have no fear, I'm safe but alone  
It's a cold world, a lone world, it's hard for a girl  
I wish you'd open up your eyes  
See my pain through all the lies  
In this room I wish I'd die  
Though my tears, I will not cry. Take me home

Take me home  
Take me home  
Take me home
