Tonight I see a simple face
That doesn't hold no worries
As we get closer no fear is left
And it's right, so right, so right
To feel this safe

Tonight you feel a simple care
How would it be if we were somewhere else
Where the sun shines and no one cares
How it ends, how it ends, where it ends
This blessed day

We may be tired of walking
But tonight we fly
This ground may keep us knocking
But tonight we're sky

We stare at night but it's getting near dawn
We'll go our way and we'll keep it low
Carved our names to remember so
But it fades, it fades in time
As we go

It fades as we go

We may be tired of walking
But tonight we fly
This ground may keep us knocking
But tonight we're sky
