Just outside of denver, it's the end of december
I can barely see the road, I'm drivin home
The weather man is callin, for the snow to keep fallin
I'll be lucky if I'm in boulder, before long
Cause I've got for bald tires, on this ol truck
The last thing on my mind, is gettin stuck

Chorus

It was fort worth a year ago, headin down to the coast
Change of clothes in a walmart sack, worm gulf breeze
upon our back
It was a far cry from colorado, when I look out my
window
There's nothin out there but wind and snow, but in my
mind I see the coast of mexico

2nd verse

We were down there by the ocean, I can still smell that
sun tan lotion
See that ice cold corona, in her hand
And as we lay there on the blanket, I remeber thinkin
How I wish this day, would never end
Sign says this roads closed, two miles ahead
Looks like I'll have all night, to try and forget

Chorus

It was fort worth a year ago, headin down to the coast
Change of clothes in a walmart sack, worm gulf breeze
upon our back
It was a far cry from colorado, when I look out my
window
There's nothin out there but wind and snow, but in my
mind I see the coast of mexico
