"I Want You"

I was running away from you
Every day was dark and blue
You were always on my mind
My precious
It's the fate that I can't find

(Chorus)

I miss you
I need you
My heart is burning with this love
It makes me want you even more

I was hiding the love from you
Every night was dark and blue
Now I'm trying to start all over
I surrender to your heart

(Repeat chorus)

It makes me want you even more

My heart is burning
Burning with this love

(Repeat chorus 2x)

I want you
I want you
