Visit "[Go With Me](#)" on MotoLyrics.com

Won't you go with me
I could take you places you wanna be
I could take you there take you every where
Won't you show me baby that you're not scared
Then I'll take you there

I swear you had me opened till the point of no return
You thought I would've learn from the broken hearts
that burn
But this was different I didn't throw myself to fast
'Cause usually with that shit you know it'll never last
See I'm a lady so I present myself with class
I take my time don't wanna get dipped and dashed
Remember me boo I used to roll with snaughty crew
And had that attitude like
We'll body you I was a baby than now I'm your lady
friend
I wanna show you the new ways that I can sin
See everything I hold don't show

But if you wanna know than baby we could roll
I'll show you all my different flows
See I'm about this game that's rising me to fame
And yet I choose you 'cause I don't really fuck with
lames
Love to be your only dame and no matter what you see
You never switch in lanes who knows where this could
go
If you do feel the same

Won't you go with me
I could take you places you wanna be
I could take you there take you every where
Won't you show me baby that you're not scared
Then I'll take you there

Baby girl the best thing is just to let your feelings go
I wanna get to know you intellectually or maybe even
sexually
Types of dreams but never came true
Look all you gotta do is open up boo and show me is
you

You wanna be lonely and blue forget about a homie or
two
Is only a few that could vibe with you

You see me I'm like a thief in the night
I run the streets in the night
And you you like to stay home but me I'm at the zone
Look trying to figure out ma what's it's all about huh
But still I carry on I put that on my own look
You could hold me down ma I take you out of town

I got chickz for that so you could be the one
That has my only son that Grows to be a man
I put that on my right hand
I hope you understand I'm a holla at you later girl
I promise you'll do great in the world
Now take it home and think about it

Won't you go with me
I could take you places you wanna be
I could take you there take you every where
Won't you show me baby that you're not scared
Then I'll take you there

So you never had a girl that's precious as a pearl
And at the same time all out against the world sexy and
tough
Yeah I got that stuff yeah you stick around long enough
boo
You see what's up, yeah, you got to tell me something
about you
'Cause I'm hanging around here all on a good view
Like could you be true blue your words you stick too
Would you be the type to make me catch a quick flu
And if you catch a case I feel like sticking it through

Are you the kinda guy that's gonna take me high
And have me saying word's like love and never lie
Don't let that pass relation bullshit get in my eyes
You thinking we could rise than baby we could rise
And if you having worries push it all aside
If at the end it works out it's all because we tried
And if you looking for love you know with me you find

Won't you go with me
I could take you places you wanna be
I could take you there take you every where
Won't you show me baby that you're not scared
Then I'll take you there

Won't you go with me

I could take you places you wanna be
I could take you there take you every where
Won't you show me baby that you're not scared
Then I'll take you there
