Take back all the things you've said
You, and I've got all that we desire, yeah right.

Crumbling, your head in your hands. Got to work it out,
got to hurry now.
With the light down low, you're moving slow. Turn
around

Take back all the things you've said, tonight.
You, and I've got all that we desire, yeah right.
Make me, make me love you.
Or we'll never have anything we want.

Crumbling, your head in your hands. Got to work it out,
got to hurry now.
You're afraid of this life, and death. Turn around.

You, and I've got all that we desire,
You, and I've got all the fire.

Hurry up, got to hurry up.

I live to tell you're amazing.
So why are you fading away?
Don't need nothing from you.
Don't even need the truth.

Crumbling, your head in your hands. Got to work it out,
got to hurry now.
With the light down low, you're moving slow. Turn
around

Make me, make me love you.
Or we'll never have anything we want.
