"Sigh"

An area I need time to think about
Given time it will heal.
Feeling farther away from your scars more everyday
I need you to stay...

You were a lie. I still miss you

An area I need time to think about
I need you to stay... the fuck away

You were a lie. Through the cold, and dark nights.
When we wallowed, and we wallowed.
Together...

We should have known it all along.

Your love is still radiant here. No matter the downside
of lies.

You were a lie.
Someone pinch me, wake me before I realize I'm
feeling somewhat safely through a sigh
Give us a sigh
Hold the sigh I swear I'll beeline.

Hold the sigh. It's all we have tonight... tonight

Hold the sigh I swear I'll beeline... spirit, and the truth
they both divide.

Hold the sigh I swear I'll beeline... spirit, and the truth
they both divide.
