The first day, that I saw you, I thought you were so fine  
I thought that you could be, that you could be the one  
It took me weeks and weeks, to get the nerve to talk to  
you

I had such very high hopes, that you could be the one

You think that you are hot stuff, think that youre pretty  
cool,

But in my deck of cards now, you play the fool

And when I look back on it, on all the wasted time

I spent just thinking about you, and wishing you were  
mine

I had the fever, but the fever is gone ( I dont want you  
anymore)

Tryin to shake you but youre holing on

Thought you were right but youre Mr. Wrong

Sad but true, Im over you!

I had such very high hopes, that you could be the butter  
for my toast,

In my mind, you were red hot, but it turned into a long  
shot

Because I guess this time well, I just changed my mind

I didnt mean to lead you on, I had the fever for the  
flavor but the fever is gone

Started off strong, but it didnt last long

I dont want you anymore, tryin to shake ya, but youre  
holdin on

Thought you were right but youre Mr. Wrong, sad but  
true Im over you!

Dont want you! I dont want you anymore!
