"Existence Unveiled"

What is and what is not
What is won and how it is done
What will never be undone

What has been and never was
Truth inferred from struggles lost
What will be and might be done
Why

I started as a coincidence
A failure condemned to torment
A mere consequence of my predecessors choices

I am the meaning of myself
I am the meaning of existence

In the prediction put before me
The path paved with life
Obsolete conclusions of lives prelived
This path no longer holds my destiny

I am the meaning of myself
I am the meaning of existence
