Intellectual crucifixion  
Mass destruction, evolutionary override  
Contempt for the flock, misanthropy personified  
Woven narcissistic curtains, a blinding dissection

A perverse experiment, ill-conceived  
A sickening sight, the disease revealed  
I live in contempt of humanity

Rotting in ruins, bleeding hindsight as sadistic delight  
On the eve of implementation, an error revealed  
Wheels in motion on eccentric axis  
Evolution rolls to it's own demise

We burn, fueling ourselves

We die, a cancerous breed  
We emerge, in our ashes as a seed  
In contempt of humanity

Songs to our children, reminders of the past  
From the eons of tragedy, the final chapter unfolds  
In the mist of the future, lies the blood of the past

From the carcass crawl the remnants  
A random selection, children of the past  
A timeless defect, viral disease - humanity  
Once again the sound of destruction  
The wheels of evolution crush again
