"Mother Earth"

Visit "[Mother Earth](#)" on MotoLyrics.com

Stars falling down to mother earth
We walked around and found the dearth
In nothingness - no consciousness
Sleeping stones under the bottom of the sea
Slumbering bombs sink for a shabby fee
Golden hair in a glimmering shade
Stories about the water-mermaid

On mother earth we walk
On mother earth we talk

Stearns - machines and lunar modules
Falling down to the moon
On it we walked around to find
Black gold - a desire - another empire
Stars hover in the space
A billion years in delays
Earth and thoughts are in eternal moves
To find the what in the why if the answer is never the
truth
