In times when you're troubled

Seems more than you can afford

And you feel you need a friend

Someone to share the load

When your sky grows cloudy

I want you to know

You got a friend that's true

(CHORUS)

Just like a shelter

In the time of storm

I'll see you through

That's what I'll do

If your dreams are scattered

Just like the wind blown sand

And you feel, you feel like

You need a friend, I'll be there

Reach out your hands

And when the rain starts to fall

I'll be there, just to hold on to

(CHORUS)

Just like a shelter

In the time of storm
I'll see you through
That's what I'll do
(I will see you through)
(I will see you through)
(I will see you through)
(I will see you through)
(I will see you through)
(I will see you through)
(I will see you through)
(I will see you through)
(I will see you through)
I'll see you through your hangups
I'll see you through your fears
I'll see you through sad times
Honey, I'll dry all your tears
And when the tempest is raging
I want you to know
You got a friend that's true
(CHORUS) 4X
(I will see you through)
(I will see you through)
