One day I was cryin'
'Cause I thought that
Love was something that would
Never come my way, no way

That's when somebody told me not to worry
They said love would surely one day be my friend
And I would never have to be without it again
And it's because

Once you know how, you just never forget how to
It may seem kinda crazy but it's a shown off thing
Been tested and found true
Once you know how, you just never forget how to love

I'm in love, I'm in love
Yes, I am in love
I can love, I can love
Ooh, yeah, yeah

Don't you know that
Once you know how, you just never forget how to
It may seem kinda crazy but it's a shown off thing
Been tested and found true
Once you know how, you just never forget how to love

Once you know how, you just never forget how to
It may seem kinda crazy but it's a shown off thing
Been tested and found true
Once you know how, you just never forget

Once you know how, you just never forget how to
It may seem kinda crazy but it's a shown off thing
Been tested and found true
Once you know how, you just never forget how to love

To love, they say, they say
Once you know how you just never forget
Once you know how you just never forget
