Words and Music by Christopher Cross and Dennis Lambert

You've seen my face  
Hey don't you know my name  
It wasn't all that long ago I had my fifteen minutes of  
fame  
If it was you caught in a crazy game  
Would you still look as good standing in the rain

Whatever gets you through the night  
Take it from me -- it's gonna be alright

Been there done that  
Been there -- then somebody takes you back  
Been there done that  
So hard, hard to avoid the trap

They break your heart -- why do we let them in  
The drug is strong but the will is weak  
We make the same mistakes again  
There comes a time we all gotta rise above  
Look inside and redefine just what it is we want from  
love

Been there done that  
Been there -- still working my way back  
Been there done that  
So hard, hard to avoid the trap

And when you feel strong enough to face up to it  
You're gonna do just fine
