

Lymphatic Phlegm

"Inflammatory Fermentation Of The Gastric Tissue"

Visit "[Inflammatory Fermentation Of The Gastric Tissue](#)" on MotoLyrics.com

It's found in two chronic and active forms: The first one in simple cases, one feels only characteristic symptoms of indigestion. In serious cases, it's registered excessive fermentation and a feeling of extreme urgency. Great alteration in the clinical condition occurs through hemorrhage or perforation. The second one comes out through infection and its symptoms are the stomach obstruction and gastric slowness. This one will need a detailed surgery, so that no rupture of the gastric ligaments may occur.
