Babe we've had our share of hard times
But somehow we managed to see them through
And at last we can say with this love there's a way
Cause everything's falling in place for me and you
Babe we came so close to get enough there were times
it seemed we only trained to do
That old road's been long and wide but at last we
almost arrived
And everything's falling in place for me and you
Everything seems to be falling in place now
And I know that all the pieces will soon fit together for
me and for you
So at last we can say with this love there's a way
Cause everything's falling in place for me and you
So at last we can say with this love there's a way
Cause everything's falling in place for me and you
Falling in place for me and you falling in place for me
and you
