The clock is tick tick ticking away
She got a new pair of shades that she bought when she
went shopping
Only 27 hours away
From skipping rope on a star, she's drinking gin with
janis joplin

The earth is just starting to bore me
and all the people out there just adore me yeah

I wanna go to the sun (somebody take me there)
That's where the living is fun (and I won't get no evil
stares)
I wanna go to the sun (somebody take me there)

She stole a class cutting pass today
And she can fake a teacher's signature like nobody can
I bet you'll never guess what she's gonna say
That I'm the captain of the rocket and you're the 2nd in
command
