Ohhhhh

Last night you said you wanted to talk wit me
I was at work and you know how my job can be
So then you said it could wait until later on
Cuz it wasn't all that important so I guess we can talk
when you get home
So then you got me thinking about what I might have
done
Wondering if I did something wrong (something
wrong)
But then again and within this time I thought that you
were mad
It could've been that just made you happy

Chorus:

If there's anything that you want, you need
Don't be afraid to ask cuz you're my girl
If there's anything that you want, you need
Don't be afraid to ask cuz you're my girl

Girl don't you my whole world stops for you
And in this relationship you are the person I run to
And I appreciate how you respect my space
But on the real I'm there for anytime of day
You should never start to wonder where you stand
Cuz everyday I want to show you that I'm your man

Chorus: x2

Cuz these nobody whos got your back like I do, girl
Oh no baby see no trouble
I'm your man
I'm gonna be there for you

Chorus fades
