Well I heard it all before  
But this deserves an explanation  
From the underwear on the floor  
Please excuse the exclamation  
Shit, I thought for a certain that I'd make it through the  
season  
But your skills at love, they sure do suck  
So don't give me a better reason

And it's a sad sad situation  
That love created jealousy

It's the last sleep you'll get tonight  
It's the last fight you'll have to fight  
It's the last time I'll be coming around

And I know you know it's true  
Everything's on 1 condition  
And tell me where the hell you were you  
When I came down to the station?  
Well I keep a box of sticks and stones in the back seat  
of my car  
Just in case I see your face with another face for you to  
scar

Don't call  
Don't write  
You know you've lost it when you still keep trying  
But I can't spit back in your face
