Gravity is my enemy,  
It grabs at me like harmony.  
The stars are bangin' close to me,  
As I'm floatin' in a life odyssey.

My lines are down, you can't call me,  
As I fly around in space odyssey.  
My lines are down, you can't call me,  
As I fly around in space odyssey.

Like Puzzle Bobble on PC,  
It's got color waves following me.  
And I still judge it week by week,  
And I'm ahead of time, so you'll never lose me.

My lines are down, you can't call me,  
As I fly around in space odyssey.  
My lines are down, you can't call me,  
As I fly around in space odyssey.

Ohh... Ah, ah ah...

Can I take a minute or two,  
To introduce my point of view?  
I need to spend some time with you,  
There's nothing more new on the news.

My lines are down, you can't call me,  
As I fly around in space odyssey.  
My lines are down, you can't call me,  
As I fly around in space odyssey.
