how can you call this land we walk on free  
two centuries of deception  
a system put in place  
dollars bear their face  
equal rights those who can afford to pay  
content to believe what they say  
they say democracy  
i scream a scam  
big bucks from big business buy uncle sam  
no conspiracy it's apathy  
we the people can't seem to just open our eyes  
content to believe all their lies

hey they gotta go  
how can we take back what was ours

you gotta know  
what they are doing to you

kids die for their country  
but they can't buy beer  
they'll outlaw what's natural  
motive unclear laws are put into place  
their morals in my face  
but we got an ace up our sleeve  
opression plants rebellion's seed

now the time has come  
to say fuck what they've said what they've done  
yeah we're young and dumb  
but as asume  
we are worth more than one
