What do you think of babe
What do you think of babe
What do you think of
You make me scream inside
You make me dream
You're on the screen tonight
You don't need that lipstick on your skin
You're miles away but you let me in
Why you better better get ahead now
Why you can't remember what to say now
Why you're waiting for a better day now

When you slowly open up your hand
To see if you understand
Think of babe
What do you think of babe
What do you think of
Do not open up your heart
Cause maybe this will hurt
And maybe then you like that juicy feeling
About that hugging screaming and stealing
In your personal rock 'n' roll
