

Mad Heads "Electricity"

Visit "[Electricity](#)" on MotoLyrics.com

There is something that lives in the house of mine
Giving warmth light and information
And whatever I do it's always close behind
Helping out full of admiration
I got used so much to it's presence that
If it disappears I'm in full dismay
Sometimes it seems I'm no master here
Seems it pulls the strings and I just obey
Electricity is all around me
I can feel it's strange and dangerous smell
Electricity wants to capture me
And I want it to go back to hell
Getting sick getting weak blind bald deaf and dull
I'm addicted to live with the monster
It's sucking life out me out of you all
Getting total control of all the world
When I strike my strings I imagine that
I am clutching the demon by the horns
But the truth is I'm only enjoying my dream
And how long will this dream go on
