We've been out in the park  
Walking down the lanes  
All the benches were packed with lovers  
Kissing like insane  
Deep into the shadows of the trees  
We took the path  
And in the nearby bushes  
We saw the bare ass  
You know it's spring in the town  
And everyone is crazy  
Spring in the park  
Especially when it's dark  
Spring in the bushes  
You get it right  
There ain't no fun in sitting home  
So won't you come outside tonight  
The ass was moving back and forth  
And so the case was clear  
Who cares the park is big  
It's not the only place down here  
My girl was a bit upset  
We found our bushes occupied  
But I kissed her tight and squeezed her tight  
And we walked into the night  
We went down a little further  
All along the path  
We looked around for a place to stop  
And saw another ass  
We've got that far we've got that deep  
That the park became the woods  
But we couldn't find a place for love  
The park was goddamn overcrowded
