I cannot stay anymore hope you see it my love
Let the day be too long it is never enough
For me to be with you
For you to be with me
But now it's time...
You're my rockin' lady I'm your rock'n'roll man
But the day has already come to it's end
The day is over it's already in past
I know we'll always be the best
In twanging, beating & shouts...
Give me please one more kiss and I'll give you mine
Tell me please one more word and I'll tell you good
night
For you it's time to sleep
For me it's time to go home
Good-bye...
You will wake up next morning, you'll play in your band
Sing and play night and day again and again
We'll be the famous rock'n'roll stars
I love your hair and lips and eyes
And your twanging, beating & shouts...
Now I see yellow eyes of lonely night cars
I am putting myself to the midnight bus
Night city lights are passing by
Don't notice them I think of you...
When I'm closing my eyes see you sleeping tight
And I wish you sweet dreams till the end of the night
With guitars, jeans and motorbikes
Take to your dream no other guy
But me, twanging, beating & shouts...
