"Run For Shelter"

You better run you better hide
When forces collide inside my mind
Atoms divide and sever all ties
From the Universe and mankind
Spy satellites, secret agent men
The power of the force no one can contend
Infiltration
Reincarnation of the same old situation
Evil temptation evolution vs. creation
Brainwashing synonymous with education

You better run for shelter
Everything is helter skelter
Better run for shelter
Butter run for shelter baby

I see the thunderstorms up ahead
Don't know it but we're already dead
What was meant to be heard never was said
Since the beginning of time been misled
The cold war trauma tics below the belt tactics
The metholodical and the systematic
Reduction of the construction
Of weapons of mass destruction
Only servin' one function

Better run for shelter
Everything is helter skelter
Better run for shelter
Better run for shelter baby
And these dreams are what keep
Are what keep us from being free
Everything is helter skelter
Everything is helter skelter
Everything is helter skelter
So you better run for shelter

[Chorus]

I see the thunderstorms up ahead

Don't know it but we're already dead
What was meant to be heard never was said
Since the beginning of time been misled
Signs of the times eyes on money signs
Universal truths defied human rights being denied
Science not applied for mankind
Only for the advancement on the frontline
Spy satellites access damage done
No longer do we need a man to pull
The trigger of a gun
For now all it takes is a push of a button ten thousand
miles away

[Chorus]

Everything is helter skelter
Everything is helter skelter
Everything is helter skelter
So you better run for shelter
Everything is helter skelter
Everything is helter skelter
Everything is helter skelter
You better run for shelter baby
