The city streets are cleaned w. blood from the night  
A 2 way struggle where the oppressed are right  
It comes time to be rid of the dark  
The day gives it gas and produces the spark  
Welcome to this state of daylight seduction  
From dream to voice to predicted corruption  
Power is a handicap that begins in the head  
Applied to reality once harmony now dead  
Chorus  
We will not rest till everyone's free  
Every person in this world unity  
Power and control is something that is not for me  
Lower the bridge and feel for the night  
Call it abuse they don't want to fight  
We won't get off your backs cuz we've got hope  
And we know we're right  
Dictated by the sun let moon be the slave  
Facists in power, they spit on black graves  
When one's ideals are finally put into sight  
Destroy their politics, bring down the right  
The tune is called unity and everyone can sing  
Let's stand tall and let it ring  
Free minds free speech, a cleared up head  
Freedom won't be put to rest until the day is dead
