And if I'm nervous I won't show it  
My words still come out right  
I'm the most impressive product around

Lying is completely expected in this town  
Malicious girls taking everything for granted  
With no common sense or confidence  
Just some hearts that were specifically crafted...  
(to take place of)

So get dressed in your formal attire  
'Cause I'm picking you out of the crowd  
word on the street is that's there's a position for hire  
but you wouldn't be interested anyway, anyway

If your leaving then I'm leaving yeah I'm coming too  
And please leave directions to read through  
And you don't know what you do  
And you don't know what you do

First of all there's a soothing sense of

"I don't think she's sticking around"  
We both know its in the wrong direction  
And now I think we are messing around

If your leaving then I'm leaving yeah I'm coming too  
And please leave directions to read through  
And you don't know what you do  
And you don't know what you do

Can't stay a winner if she's not a winner  
And we're not coming around again  
(gotta watch what you wish for)

Once again I'm left with out you  
Oh, she say's it's over.
