(Smyth)

When I walk with you
There's a path that I take
Leads me down to the shore where I rest
And I am not afraid there's no fear in my heart
For I have seen the light of the way

With my feet on the ground I will walk in the view
Through the light and dark of the road
And I am not afraid there's no fear in my heart
For I have seen the light of the way

Do you recall you had the fear
Like you had the fear before?
Do you remember how he told you
When you were kneeling on the floor?
Well stand up and look around
And I am sure it will be found
That there is a light on the way
