"Goodbye To Innocence"

Visit "[Goodbye To Innocence](#)" on MotoLyrics.com

I don't wanna say goodbye

There are some who believe that I owe them something
But they're wrong, I owe nothing to no one but myself
And there are some who say they created me
But only my parents will have that acclaim
I took it from there, I am to blame

Say goodbye to anonymity
I have to say goodbye
To privacy, but most of all
To innocence
To innocence
To innocence
To innocence

My life is not a game that I play to entertain you
And if you can do it better, then you're welcome to my
fame
I'm not gonna waste my time correcting myths and
rumors
You believe what you wanna believe

Say goodbye to anonymity
I have to say goodbye
To privacy, but most of all
To innocence
To innocence
To innocence
To innocence

I don't wanna say goodbye
I don't need a reason to cry
Kinda makes me wanna
Kinda makes me after

Stop and think about it
Stop and think about it
Stop and think about it
Stop and think about it
Do I want to?

I don't getting up and down
I don't getting up and down
I don't getting down and up
Up-up, d-d-down, up-up-up

I don't getting up and down
I don't getting up and down
I don't getting up and down
Up-up, d-d-down, up-up-up

Listen up
It always comes down to this
It always comes down to this

Some people have a snake at the base of their spine
That would suck out your life, that would take all your
time
They're called feeders
They're not believers but you must not fear it
They're takers

You know you better stop, stop and think about it
You know you better stop, stop and think about it
You know you better stop, stop and think about it
You know you better stop, stop and think about it

Your innocence
Your innocence
Your innocence
Your innocence

I don't wanna say goodbye
To innocence
I don't need a reason to cry
Innocence

Hold on to your innocence
Hold on, hold on to innocence
Hold on

Stop and think about it, say goodbye
Think about it
Stop and think about it, say goodbye
Think about it
Stop and think about it, say goodbye
Think about it
