You must be my lucky star
'Cause you shine on me wherever you are
I just think of you and I start to glow
And I need your light and baby you know

Starlight, star bright, first star I see tonight
Starlight, star bright, make everything all right
Starlight, star bright, first star I see tonight
Starlight, star bright, yeah

You must be my lucky star
'Cause you make the darkness seem so far
And when I'm lost you'll be my guide
I just turn around and you're by my side

Starlight, star bright, first star I see tonight
Starlight, star bright, make everything all right
Starlight, star bright, first star I see tonight
Starlight, star bright, yeah

Come on, shine your heavenly body tonight
'Cause I know you're gonna make everything all right
Come on, shine your heavenly body tonight
'Cause I know you're gonna make everything all right

You may be my lucky star
But I'm the luckiest by far
You may be my lucky star
But I'm the luckiest by far

Starlight, star bright, first star I see tonight
Starlight, star bright, make everything all right
Starlight, star bright, first star I see tonight
Starlight, star bright, yeah

Come on, shine your heavenly body tonight
'Cause I know you're gonna make everything all right
Come on, shine your heavenly body tonight
'Cause I know you're gonna make everything all right

He may be my lucky star
I'm the luckiest by far

He may be my lucky star
I'm the luckiest by far

He may be my lucky star
I'm the luckiest by far
He may be my lucky star
I'm the luckiest by far

Starlight, star bright, first star I see tonight
Starlight, star bright, make everything all right
Starlight, star bright, first star I see tonight
Starlight, star bright

Starlight, star bright, you make everything all right
What you do to me baby
You better stay by my side tonight

Starlight, star bright
Starlight, star bright
Starlight, star bright
Starlight, star bright

Starlight, star bright, baby
Starlight, star bright, stay by my side tonight
What you do to me baby
What you do, what you do to me baby
Stay by my side tonight
