Whatever happens, I am here  
Whatever happens, I wait for you

Return in the wind oh my love  
Return quickly, please

How long ago I have forgotten  
Why I got far from you

Each moment is worse,  
Return in the wind please

I know  
Who you are for/to me  
Whatever happens  
I wait for you

How long ago I have forgotten  
Why I got far from you

Each moment is worse,  
Return in the wind please

I know  
Who you are for/to me  
Whatever happens  
I wait for you

I know, I know  
Who you are for/to me  
Whatever happens  
I wait for you
