Remember when we walked along down by river's end  
Past the shops now long closed down, walk with me  
again  
Wrap this night around your memory and close your  
eyes  
Can you feel the Russian wind blow through the city  
sky?

Fall with you  
(High above the ground)  
Leaves spiral down and I  
Drift and fall with you

And when it rains a gray canvas, you have never  
seen  
Stand beneath this canopy of crimson laden green  
Wait inside the shadow cast by summer's long retreat  
Walk with me back along this late September street

Fall with you  
(High above the ground)  
Leaves spiral down and I  
Drift and fall with you
