Angel from amber
Bringing me our precious love
And I am falling ...
But I don't mind, now I know
It's so easy to let go
Every day's a new beginning
Every says you'll be all around
All I want you see with you
Right now
(Angel)
(Right now)
My angel, he never knew
That everything I lost I find in you
And our future holds no fear
You've blown it all away
Because it's easy when you say
Every day's a new beginning
Every says you'll be all around
All I want you see with you
Right now
