"On The Other Side"

Visit ["On The Other Side"](#) on MotoLyrics.com

On the other side, on the other side, on the other side
Starships following the light
On the other side, on the other side, on the other side
Spaceship trip into the light

On the other side

...people all around
Got to hear the cosmic sounds
Come on people take a ride
Let's drive up to the other side
Flying to another place
Way into eternal space
We disappear, we can hide
On planets on the other side

Moving to a thousand stars
... broken march
Captured by a burst of life
That's magic on the other side
Overwhelm of illusion
There's a feeling of confusion
We got pain and we got pride
The wide world on the other side

Far beyond the starry light
The cosmic song has an open wide
On the other side, on the other side, on the other side
Starships all...the course of time
