Energy For The Gods

[music & lyrics by: Bogdan Costea, arranged by:  
Magica]

Still I live my life in a shade of a mystery  
All I know proves false and vain  
All the science learned  
All the knowledge is for nothing  
But a truth you can't explain

Feed on me, I've got  
Fuel for ages  
That you, you will steal against all odds  
Feed on me, and then  
Then close the cages

We are, we are just energy for the gods

You still search and wonder  
Are we alone among the stars  
In this terrible waste of space?  
But you can't imagine  
That we're a harvest since forever  
Just a herd called human race

Energy for the gods  
That call me  
Energy, energy for the gods  
Energy for the gods  
That made me  
Energy, energy for the  
Gods
