The new games tutor was like any other teacher
Same blatant ideology they're trying to install in you
At every opportunity they'd press us to compete
Taught to butt and how to kick and how to stamp on
feet
How to punch, how to gouge when you're down in the
scrum
"You've got to be ruthless if you want to be a winner,
son"
If people get hurt as you battle to the top
Well, it's natural selection, it really can't be helped
So never be afraid of some healthy competition
It'll never let you down
It's what capitalism is based upon
So never be afraid of some healthy competition
It'll never let you down
It's what capitalism is based upon So never be afraid
It'll never let you down
