Just another broken heart
Any fool can see
Though we're living worlds apart
You're still next to me
I'm never gonna give you up
Never wanna make you cry
Never gonna give you up
Never gonna say goodbye
Just another lonely night
I'm missing you again
Nothing ever turns out right
So when's it gonna end
I'm never gonna give you up
Never wanna make you cry
Never gonna give you up
Never gonna say goodbye
When you start talkin' love
You know that I'd run through the night
To be with you
Talk about love
It's a walk from the dark to the light
To be with you
Start talking love
Talk about love
You left me with a broken heart
Any fool can see
Now we're living worlds apart
Guess it was meant to be
I'm never gonna give you up
Never wanna make you cry
Never gonna give you up
Never gonna say goodbye
When you start talkin' love
You know that I'd run through the night
To be with you
Talk about love
It's a walk from the dark to the light
To be with you
Start talking love
Talk about love
