Peace!) Piece of what?

You can't mean P E A C E

Cause I've seen people on the streets

Shoot the next man and turn around and say peace

But that's leaving people in pieces

It's not what the meaning of peace is

To me it means absence of all confusion

Not the oozing and brusing

That we're all so accustomed to

Your friend got beef? I'll bust him too

What a brother from a certain way of life explained to me once, dunce

He didn't realize the fact that

He and myself were brothers on the same rope

Now last month he got hemmed up, huh, that's all she wrote

So I can get up where she left the exclamation

Looking for an explanation

Little kids think that peace is a word that you use to sound down

And I frown

Cause that's what I was told at eight years old

And now I'm trying to break the mold
So stop the dominoes
Because I think it's about time that everyone knows
Peace! But everybody's in terror
We're going back to the caveman era
Where people got killed, without the chance to build
Shame how the plane is filled
With so many so-called intellects
That can't use a word in its proper context
Needless to say I'm vexed, so what's next?
Peace! It's not the word to use
When at the same time you got the plans to abuse
Folks not on their P's and Q's
I'll see you in the news
Somebody screwed up the diction
You might die looking for the right definition
Cause "peace" nowadays means "gun," or "gotta run"
30 years from now we'll wonder how the younger
generation got foul
Look at what we teach them today
Peace is not the word to play
Ayo, corny or not, we gotta stop saying "peace" and
not meaning it
Know what I'm saying? Main Source forever, y'all
Peace is not the word to play
