If I go to the dark, You illuminate  
All the shadows that aren't there  
Running away, just a poor metaphor  
'Cause I'm never quite as far as I think

Danger, the way that she moves in your brain  
Without a face  
Patient You wait, even though I was wrong  
It's not the same

Looking weak never had more appeal  
Bend the knee, stop this heart for a while  
Counting on the grace You give

Danger, the way that she moves in your brain  
Without a face  
Patient You wait, even though I was wrong  
It's not the same

Just when I think that I'm alone  
I think about You more  
And the words You said  
Are always ringing in my ears

Danger, the way that she moves  
Without a face  
Patient You wait, even though I was wrong  
It's not the same

Danger, the way that she moves in your brain  
Without a face  
Patient You wait, even though I was wrong  
It's not the same, it's not the same, it's not the same
