No fight! No fight for no one!

Slaves of machines, already too late

A.I. will take our breath

We cannot disconnect anymore

Metal machines have locked our gates

They will lead our hearts more and more

Subtilite artificielle

Psaumes electriques changeront la foi

Bien plus qu'une etincelle

Machines a tuer souffleront nos Lois!

As we created them they are

Nothing less, nothing more

No fight!
