"Gravity"

I was looking for a fantasy
Sometimes reality's just not
What you're looking for
And then the gravity pulls to commematy
High on catastrophy
And i just couldnt see the forest for a me but
There is a gravity happening in spite of you and me
Bringing us close
Double the dose
Life is a scary thing
Promise a diamond ring
Yeah anything you need you're
Standing still in the poran ring
Forget your name but anywhere
Or maybe i'll call you sometime
Why do we play these games
Isn't there any shame
To our unsalvaged pain
But eyes that see everything
Happening in spite of you and me
Bringing us close
Double the dose
