Manic depressive!
Masochistic!
(Inaudible yelling)

You don't move
Unless you know someone you can move
And I bruise
Just like anyone would bruise
And I know
We've got a long way to go
I know
We've got so far...

We built this house with our hands
And our time
And our blood
We built this up in one day
To fall down
And rust
You built this house with your hands
And your time
And your blood
You built this up in one day
To fall down
And rust

I'm gone
You tried to emphasize inside
With both of us
You're gone
In time I swore I'd take
The straight and narrow path
That still won't go
I'll hold
This here
I'm only trying to do
My job tonight
This here, my job, these lips, and crucify the fire

We built this house with our hands
And our time
And our blood

We built this up in one day
To fall down
And rust
You built this house with your hands
And your time
And your blood
We built this up in one day
To fall down
And
Never gonna feel the same
No it's never gonna be the same
No it's never gonna be the same
No it's never gonna be the same

(Children's choir)
We built this house with our hands
And our time
And our blood
We built this up in one day
To fall down
And rust

We built this house with our hands
And our time
And our blood
We built this up in one day
To fall down
And rust
(Trust in me the same way)
You built this house with your hands
And your time
And your blood
(Hold me in the same way)
We built this up in one day
To fall down
And
Never gonna feel the same
No, it's never gonna be the same
No, it's never gonna be the same
No, it's never gonna be the same

(Children's choir)
Never gonna feel the same
Never gonna be the same
Never gonna be the same
Never gonna be the same
