step one

she's gonna find her something to wear
that will blow them all away
and make all the girls glare

step two

she's gonna give it all that she's got
and make sure he's standing in the right spot
when she brushes up against
his black leather jacket
she'll be makin' her move that just says she has it

seduction

i wanna touch him
seduction
i wanna touch me

step three

just when she thinks she's caught his eye
she'll quickly look away at some other guy
she can't be too easy
can't be too quick
half of the fun is playin' hard to get

step four

just when she thinks he's had enough
she takes one more look she can't get enough
she brushes her hair with her bright colored nails
look out boys this girl never fails
