There was a girl who once made a wish  
For cable tv and a satellite dish  
So she could see every show  
While all of her friends played out in the sun  
She stayed at home watching re-runs  
Of places she'd never go  
On a teen dream movie screen  
Everything she coulda been  
Was staring back at her  
From her favourite scene  
Teen dream movie screen  
Everything she could of been  
Every day she sat mesmerised  
Till she fell asleep and closed her square eyes  
The remote controlled her mind  
If only she listened to what mummy said  
Don't sit too close or you'll ruin your head  
She wouldn't be lost in time  
On a teen dream movie screen  
Everything she coulda been  
Was staring back at her  
From her favourite scene  
Teen dream movie screen  
Everything she could of been  
Caught up in an endless transmission  
Not sure what was fact or what's fiction  
Somewhere in the static she's trying to break out  
Teen dream movie screen  
Everything she coulda been  
She saw it on a teen dream moviescreen  
She saw it on a teen dream moviescreen  
She saw it on a teen dream moviescreen  
On a teen dream movie screen  
Teen dream movie  
Teen dream movie screen (repeat to fade)
