"So Be It"

You invade my space... I'm coming

You with your face in the soil now choke on the pebbles

Soon you'll know your place... you struggle

To escape your fate, you cry... no one's coming

I'm gonna make this last

It will not be fast

In a pile of broken glass

Your life is through

I will smash your face in

I'll fight you down to the pavement

You can't see

You can't breathe

In the floor

Face in the floor
