There was pain before, but I don't care anymore.
'Cause I did the right thing, and now I'm looking inside
of you.
I know that I am still trying, it is part of my nature keep
fighting
But I'm not in a hurry; time never matters when
everything is blurry.

CHORUS

It's better this way, no pain, no happiness, just faith.
One day you will be there and you will not be scared.
It's better this way, no pain, no happiness, just faith.
One day you will be there and you will not be scared.

I already learned that your life works that way.
You are in my dreams, sometimes they look real.
And as long as you are here, there is nothing to fear.
Deep inside I know that your heart beats for me.

CHORUS

It's better this way, no pain, no happiness, just faith.
One day you will be there and you will not be scared.
It's better this way, no pain, no happiness, just faith.
One day you will be there and you will not be scared.

CHORUS

It's better this way, no pain, no happiness, just faith.
One day you will be there and you will not be scared.
It's better this way, no pain, no happiness, just faith.
One day you will be there and you will not be scared.
