So I got a little drunk and embarrassed myself  
It's not my first time  
It's not my first time  
Though somethin would somethin would happen  
thought you were somethin else  
That was a big lie  
That was a big lie  
I never really ever ment to be taken everything so  
seriously  
It's not the first time  
I should know better  
But I guess I don't  
I don't know a thing about you  
Beside a little fact that I want to leave me here without  
you

Tried to make you kiss me but you wouldn't imblige so I  
said get out yeah get the fuck out  
The whiskey on my mouth started to fall from my eyes  
yeah just like a rain cloud yeah on a dark cloud  
I never really ever ment to be presenting myself so  
desperately  
It's not the first time I should know better

X2  
But I guess I don't  
I don't know a thing about you  
Besides a little fact that I want to don't leave me here  
without you

So I got a little drunk and embarrassed myself  
It's not the first time  
It's not the first time
